The Gates of Hell & ‘Luciferase’

“Things won’t get back to normal until we have gotten a vaccine out to the entire world”
– [Bill Gates](#)

Nothing here is speculation. I will just present the facts and evidence, and you can form your own conclusions.

Bill Gates, along with Robert Langer of MIT, have developed a human implantable quantum dot tattoo micro-needle vaccination delivery system, which will also double as proof of vaccination.

Firstly, we have the never-tested on humans mRNA based COVID-19 vaccination that he wants to give every person on earth.

Then there will be quantum dot micro-needles, a digital identification mark, in the form of a dye under the skin, a sort of tattoo that can be detected with special light and/or scanners.

The ink or dye required is called Luciferase.

And lastly, either a implantable microchip, or more likely; the same type of nanoparticles used as a delivery system of mRNA vaccines will act as transmitters once inside the body, transmitting every detail about you in real time, including exactly what you are doing, and you will be rewarded with a centralized cryptocurrency for performing approved tasks. Of course you may also be penalized as well, if you do something to displease Gates.

This is all detailed in a patent filing, numbered; WO2020060606.

I'll now demonstrate every point made above.
You may want to sit down for this.

The Gates of Hell;

Firstly, it's well known that the Bill & Melinda Gates Foundation (BMGF) have wanted to vaccinate the entire planet for some time now, and who has publicly stated his interest in "reducing population growth" by 10-15%, by means of vaccination.

Gates, UNICEF & WHO have been credibly accused of intentionally [sterilizing 500,000 Kenyan children](#) through the use of a hidden HCG antigen in tetanus vaccines, and [vaccinating a tribal village of 30,000 young women in India aged between 9-14 with an experimental HPV vaccine](#), causing deaths, and [giving some 500,000 children in India again, polio, via his oral polio vaccine \(OPV\)](#).

Humankind has never had a more urgent task than creating broad immunity for coronavirus. It's going to require a global cooperative effort like the world has never seen. But I know we'll get it done. There's simply no alternative. <https://t.co/1DRkgqJ39k>

mRNA-based vaccines to be used;

Next is the type of vaccine. It's already been confirmed the [mRNA based vaccines from Pfizer](#), Moderna, & other companies will be distributed in the West. mRNA technology delivers 'coding' to your DNA, turning you into a '[Living Foundry](#)' of vaccines. It has never been deemed safe enough to use in humans. Until it was rushed through, skipping animal trials in 2020.

Quantum Dot Tattoos;

Next is the Certificate of Vaccination I.D., or 'Quantum Dot Tattoos', developed by Bill Gates and Robert Langer, of MIT.

It's worth noting that Bob Langer, one of the founders of biotech company Moderna, [became a billionaire this year](#) when the announcement of Moderna's phase I trials sent the stock soaring 30% on top of recent gains. [Moderna](#) are also producing an mRNA-based vaccine included in 'Operation WarpSpeed', called [mRNA-1273](#).

An Invisible Quantum Dot 'Tattoo' Could Be Used to ID Vaccinated Kids

VICTOR TANGERMANN, FUTURISM
21 DECEMBER 2019

For the people overseeing nationwide vaccination initiatives in developing countries, keeping track of who had which vaccination and when can be a tough task.

But researchers from MIT might have a solution: they've created an ink that can be safely

Quantum Dot Tattoos are minuscule quantum dots – tiny semiconducting crystals that reflect light – that glow under infrared light. The pattern – and vaccine – gets delivered into the skin using hi-tech dissolvable [micro-needles](#) made of a mixture of polymers and sugar.

"Luciferase" The Quantum Dot Tattoo

The Gates and MIT are currently developing the "Human Implantable Quantum Dot Microneedle Vaccination Delivery System." It's a tattoo for the hand, which will include our identification Mark and vaccination records.

It needs an enzyme called Luciferase in order to make it work.

Luciferase;

Luciferase is a very unique enzyme, derived from fireflies.

It's a '[near infrared bioluminescence enzyme](#)' which is the chemical that will make the quantum dot vaccination readable through a special mobile device app or infra-red light.

QuantiLum® Recombinant Luciferase is a luciferase expressed from a cloned gene from the North American firefly (*Photinus pyralis*) that provides the reliability and dependability needed for performing research or producing kits using bioluminescence reagents to detect ATP or luciferin substrates.

Luciferase will make the vaccination readable long after the victim has been injected, and functions as a mark.

Below are different test photos of Luciferase;

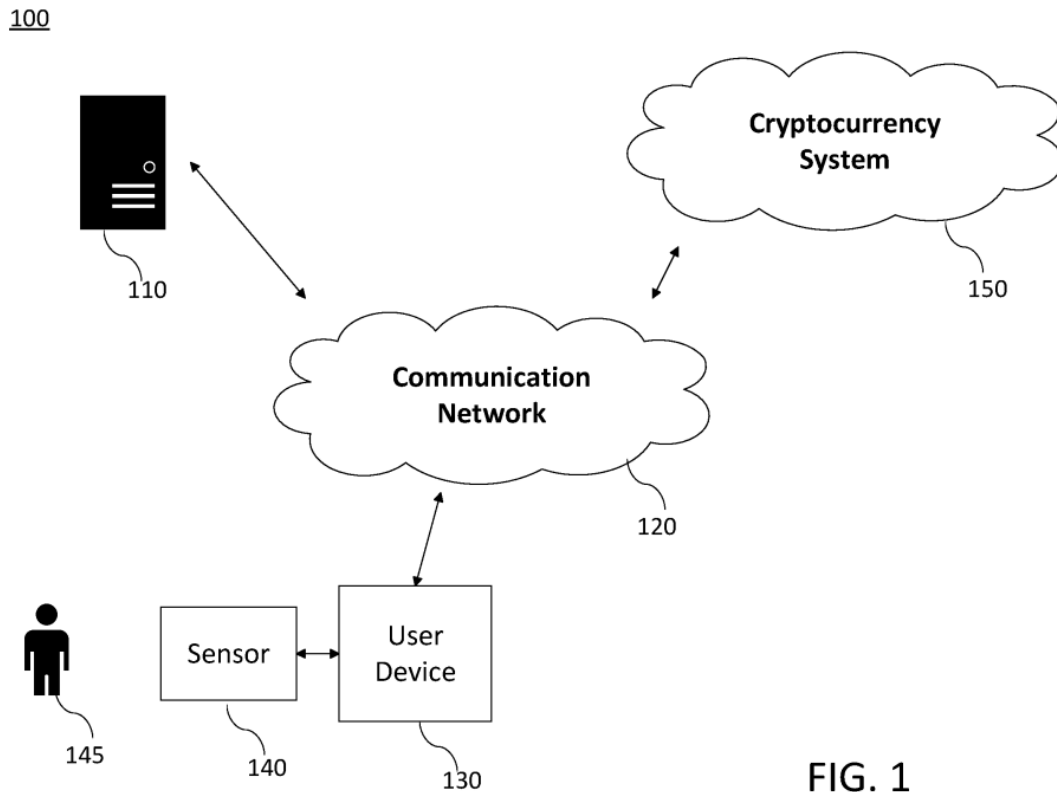

As for the column on the left, well it came with the pic, however, presuming the math is correct, it's a little ominous, but at the same time, classic Billy Gates.

And that's the Luciferase in Gates' **Human Implantable Quantum Dot Micro-needle Vaccination Delivery**.

Patent #WO2020060606 – CRYPTOCURRENCY SYSTEM USING BODY ACTIVITY DATA;

—World Order 2020 060606

WO2020060606 – CRYPTOCURRENCY SYSTEM USING BODY ACTIVITY DATA

Firstly, [yes it is a real patent number](#), filed on 5/July 2019, [granted 18/April, 2020](#).

Why such an obvious, and frankly repugnant to many, patent number? That I can't explain, but anyone familiar with machinations of the likes of Gates will know they do seem to have a penchant for symbology, *and* rubbing the people's noses in it. [[Full patent application and description – PDF](#)]

According to the patent description it works like this; a transmitter in or on your body transmits to a device, such as your mobile smart phone. The patent does not detail exactly how data is transmitted from the body to device. It may be an implantable chip, as proposed by the organisation [ID2020](#). However, nano-particles have recently been made to act as transmitters; Dr Charles Lieber, who was [arrested recently for working for the Chinese Communist Party as well as Harvard U](#), is a leading expert in meshing electronics, [nano-particles and human tissue](#).

The transmitters are most likely to be nano-particles, as they can't be removed from the body,

same a chip. Then human body activity, which may include thoughts, feelings, and real-time data-collection, is used to ‘mine’ a crypto currency. ‘Mining’ in cryptocurrency terms means the electronic ‘discovery’ of new crypto by solving complex algorithms, and the energy required to solve these complex mathematical equations can be generated by human movement. Activity is then rewarded with crypto currency (UBI?).

[0005] Some exemplary embodiments of the present disclosure may use human body activity associated with a task provided to a user as a solution to “mining” challenges in cryptocurrency systems. For example, a brain wave or body heat emitted from the user when the user performs the task provided by an information or service provider, such as viewing advertisement or using certain internet services, can be used in the mining process. Instead of massive computation work required by some conventional cryptocurrency systems, data generated based on the body activity of the user can be a proof-of-work, and therefore, a user can solve the computationally difficult problem unconsciously. Accordingly, certain exemplary embodiments of the present disclosure may reduce computational energy for the mining process as well as make the mining process faster.

[WO2020060606 – CRYPTOCURRENCY SYSTEM USING BODY ACTIVITY DATA](#)

The data is then uploaded from your device to cloud storage.

The ramifications of being hardwired into a system of a centralized digital currency that can be awarded for approved behaviour, and deducted, or even switched off if the individual engages in any sort of unapproved actions is terrifying. Of course, you will be unable to buy or sell (the crypto) without the mark. Where have we heard that before? [\[13:17\]](#)

I want to make it clear that this system uses a *centralized* crypto currency, Not too dissimilar to our 93% digitized money now in 2020.

Alternatively, Bitcoin and other *decentralized* cryptos offer the opposite of dystopian nightmares.

The huge difference being who is controlling it; a central body, or nobody and everybody at the same time through a [distributed ledger](#).

Time to [get familiar with Bitcoin](#) folks.

The ID2020 Alliance;

We need to get digital ID right

Identity is vital for political, economic, and social opportunity. But systems of identification are archaic, insecure, lack adequate privacy protection, and for over a billion people, inaccessible. Digital identity is being defined now — and we need to get it right.

Discover the Alliance

If the transmitter were to be an implanted RFID device, it would most probably come from [‘The ID2020 Alliance’](#), which Microsoft also fund.

The United Nations’ WHO is also part of ID2020. Scaring the world and making people feel unsafe, all the while stating that we can’t return to normal until everyone has been vaccinated.

I’m not interested in conspiracy theories, but I am interested in conspiracy fact, and this is in the open. There is an agenda to destroy the world economy and make people feel unsafe, to condition them that they have to be certified, and then and only then will they be safe to return to the workforce, or get on a plane. Or do anything really.

Bill also states that; [700,000 People Will Be Harmed Or Killed By Coronavirus Vaccines](#). The cost of doing business I guess.

At first we’ll see how mRNA via injection goes, but at some point there will need to be some sort of proof of vaccination, and logic dictates that it will be Quantum Dot Tattoos.

Click the links. It’s happening now.

What if the government said that if you agreed to take the vaccine and received the ‘ID2020’ digital immunity passport, *all* debt of any kind would be forgiven in exchange for property rights?

[By 2030 you will own nothing and you’ll be happy.](#)

Welcome to global communism.
